

7100 PLUS

Designed with your good taste in mind

Everybody appreciates a coffee break. Especially when it gives them the opportunity to get their hands on a lovely cup of delicious, freshly brewed coffee. That's why we offer you our 7100 series with modern, tasteful tabletop models that will be at home in any environment where coffee is appreciated.

Attractive and user-friendly

The classic, elegant Wittenborg 7100 series launches now a stylish makeover that embraces a cool, contemporary aesthetic. There is a new, intuitive user interface featuring a back-lit, touch sensitive selection panel alongside a new graphical display.

Innovative on the inside

When you open the machine, you immediately see the ingenious, practical coffee concept and realise why the combination of the latest vending technology and the unique water and mixing system make the machine so easy to maintain and so quick to fill.

Drinks to suit all tastes

You can look forward to your next coffee break! Because the 7100 series by Wittenborg brings you exceptional taste sensations based on freshbrew tea, freshbrew coffee, or bean to cup coffee ... And satisfies even your hottest wishes!

- 7100 PLUS is going green with an improved boiler insulation for both Espresso and Freshbrew versions, giving an energy saving from 20 to 39 % compared to the uninsulated boiler (standby mode).
- ES 7100 Plus achieved the A+ Energy rating, while FB 7100 Plus obtained the A Class, according to EVA EMP 3.0 standard

FB 7100 PLUS

A safe choice

The freshbrew model, available in coffee or tea versions, gives you plenty of choice and is particularly user friendly. The obvious solution if you put a premium on versatility and want to be sure users always get what they want.

ES 7100 PLUS

The connoisseur

The espresso model lets you serve a wide variety of coffee solutions that will satisfy even the most discerning taste buds and will give everyone the coffee of their dreams!

New intuitive user interface with touch on icon technology, elegant design with backlit poster area (two different graphics available) and top-lighted coffee window with aluminum frame

Optimum ease of use is in focus with the large, open serving area. The service is improved by the anti cross contamination system. Developed to avoid drips of coffee when delivering a cup of water, the new double cup holder allows you to have two cups positioned so that water can be delivered on the left, while the other drinks on the right (not simultaneously).

The FB and ES 7100 Plus have a large, ergonomically designed coffee container with a capacity of more than 200 cups of coffee. The container makes the coffee tantalisingly visible to users and can easily be pulled out and refilled while still in the machine.

The 7100 Plus reveals its functionally designed interior with smooth surfaces, clear colour codes and easy access to all serviceable parts. This ensures easy, rapid and effective cleaning and maintenance.

Extreme makeover!

A single glance at the attractive table-top models of the 7100 series by Wittenborg is enough to convince you that this machine has class. The elegant Scandinavian Design, bearing the signature of a Danish Designer, defines a rigorous, hi-tech style. These lines are the result of a number of distinctive elements. The choice of high quality materials - from which a coffee window enhanced by the aluminium frame - the evergreen, essential and elegant graphics visible on the backlit panel. An advanced technology that simplifies the use: with the touch sensitive selection panel and an all-new 5.7 graphical display, able to show both videos and static pictures. 7100 Plus is unique quality at the first touch.

The 7100 Plus comes in two versions: Fresh Brew (FB) and Espresso (ES). The FB 7100 Plus is based on classic ground coffee. The ES 7100 Plus is also based on coffee beans, which guarantees espresso of the highest quality.

With its flexible configuration options, programmable cleaning cycle and optimised filling and maintenance procedures, the 7100 Plus series is perfect for offices, administration buildings, reception areas, kitchenettes and canteens. With the option to install a coin mechanism or cashless system and a wide selection of accessories, it ticks all the right boxes for a modern coffee solution, whatever your taste!
